# GOVIND PATEL

UI/UX Designer | Product Designer
Pune, Maharashtra, India | govind28patel@gmail.com | Open to full-time roles in Pune and Bengaluru | Immediate joiner
Portfolio: govind28patel-bit.github.io/Govind-UX-Portfolio | LinkedIn: linkedin.com/in/govind-patel-53023629a
GitHub: github.com/govind28patel-bit | Behance: behance.net/govindpatel2003

## SUMMARY

UI/UX designer pursuing an M.Des in UI/UX Design, with a background in animation, graphic design and video editing. Skilled in user research, usability testing, service blueprints, user flows, wireframing and high-fidelity prototyping in Figma. Completed two live industry projects through Demola (regional electric flight and Konecranes). Top 50 Honoree at Design Pitch 2026 and Top Fellow in the NextLeap Product Designer Fellowship.

## WORK EXPERIENCE

**Graphic Designer and Video Editor Intern (E-learning)**
Tata Technologies | Pune, Maharashtra | Jun 2023 - Jun 2024

- Designed graphics, illustrations and animated visuals for e-learning modules and training manuals using Adobe Photoshop, Illustrator and After Effects.
- Edited training videos and motion graphics that explained technical concepts to learners in engineering training programs.
- Worked alongside the UI/UX team on screen layouts, wireframes and UI assets in Figma for e-learning modules.
- Applied visual hierarchy, typography and shared style guides to keep training material consistent, and revised designs through reviews with subject matter experts.

## PROJECTS

**Vayu: Passenger Experience for Regional Electric Flight**
Live industry project, Demola | Service Design, UX Research, App and Web UI | Case study

- Designed the end-to-end passenger journey around the 20 to 40 minute charging or battery-swap stop that electric aircraft need on India's UDAN-type regional routes.
- Built research-based personas (family, senior, business and budget travellers) and as-is and to-be service blueprints; the as-is journey showed the deepest emotional dip at the unknown wait.
- Prioritised 13 ideas on an impact/effort matrix and designed a booking app and website: stop shown in search results, 12-hour seat hold, live battery countdown and an automatic delay payout after 45 minutes.
- Defined perceived wait time as the north-star metric, set one success metric per idea and wrote a usability test plan for real passengers.

**Konecranes: Decision-Ready Crane Maintenance System**
Live industry project, Demola | Team of 5 | UX Research, Concept Design, UI Design | Case study

- Turned crane condition-monitoring data into clear guidance for operators, supervisors and technicians: keep operating, schedule maintenance or stop.
- Mapped stakeholders, benchmarked Liebherr, Manitowoc, Terex and Tadano, and identified four user friction points.
- Iterated six times, from a ticket system to a role-based maintenance system built on trust and communication, and delivered an eight-screen interactive demo with user flows for three roles.

## SKILLS

**UX Research:** User Research, Usability Testing, Competitive Analysis, Heuristic Evaluation, Personas, Journey Mapping, Service Blueprints
**UX and UI Design:** Information Architecture, User Flows, Wireframing, Prototyping, High-Fidelity UI Design, Interaction Design, Visual Hierarchy, Typography
**Visual and Motion:** Graphic Design, Motion Graphics, Video Editing, Illustration
**Tools:** Figma, FigJam, Adobe Photoshop, Adobe Illustrator, Adobe InDesign, Adobe After Effects

## ACHIEVEMENTS

- Top 50 Honoree, Design Pitch 2026, UMO Design Foundation (UXINDIA Design Leadership Week, Bengaluru)
- Top Fellow, NextLeap Product Designer Fellowship
- Demola certificate for two live industry projects: Vayu and Konecranes

## EDUCATION

**M.Des, UI/UX Design** | Ajeenkya DY Patil University | 2025 - 2027 (expected)
**BSc, Animation and Multimedia** | Arena Animation | 2021 - 2024
