GOVIND PATEL

UI/UX & Product Designer
Pune, Maharashtra, India | govind28patel@gmail.com | Open to full-time roles in Pune & Bengaluru | Immediate joiner
Portfolio | LinkedIn | GitHub | Behance

SUMMARY

UI/UX designer pursuing an M.Des in UI/UX Design, with a background in animation, graphic design and video. I run usability tests, map services and turn findings into flows and high-fidelity prototypes in Figma. Two Demola industry projects (regional electric flight, Konecranes), a Top 50 Honoree at Design Pitch 2026 and a Top Fellow in NextLeap's Product Designer Fellowship.

PROJECTS

Vayu: Passenger Experience for Regional Electric Flight | View case study
Demola project | Service design, UX research, app & web UI

- Designed the trip around the 20 to 40 minute charging or battery-swap stop that electric aircraft need on India's UDAN-type regional routes.
- Built research-based personas (family, senior, business, budget traveller) and as-is and to-be service blueprints; the as-is journey showed the deepest emotional dip at the unknown wait.
- Mapped 13 ideas on an impact/effort matrix and designed a booking app and website: stop shown in search results, 12-hour seat hold, live battery countdown and an automatic delay payout past 45 minutes.
- Set perceived wait time as the north-star metric, with one metric per idea and a test plan for real passengers.

Konecranes: Decision-Ready Crane Maintenance System | View case study
Demola project | Team of 5 | UX research, concept, UI

- Turned crane condition-monitoring data into clear guidance for operators, supervisors and technicians: keep operating, schedule maintenance or stop.
- Mapped stakeholders, benchmarked Liebherr, Manitowoc, Terex and Tadano, and identified four user friction points.
- Iterated six times, from a ticket system to a role-based system built on trust and communication; delivered an eight-screen demo.

Bank of Baroda: Usability Testing & Website Redesign | View case study
Solo | Usability testing, heuristic evaluation, IA, UI redesign

- Tested five home-loan tasks with three participants (ages 26 to 42) and benchmarked the site against SBI, HDFC and Axis Bank.
- Ran a heuristic audit of five screens, drew eight key insights and redesigned the homepage, navigation, and loan and FD flows as guided 4-step flows in Figma.

DermaSafe: Allergy-Aware Ingredient Checker | View case study
Solo | UX research, UI, coded prototype

- Designed an app that checks a mixed Indian skincare shelf against a person's allergy profile; built a 45-screen coded prototype using a double-diamond process.

More: Me4U multi-device concept (phone, watch, car display), Furever Family pet health app, Spotify mobile redesign. See portfolio.

EXPERIENCE

Graphic Designer & Video Editor Intern (E-learning), Tata Technologies | Pune | Jun 2023 to Jun 2024

- Designed graphics, illustrations and animated visuals for e-learning modules and training manuals in Photoshop, Illustrator and After Effects.
- Edited training videos and motion graphics that explained technical concepts to learners in engineering programs.
- Worked alongside the UI/UX team on screen layouts, wireframes and UI assets in Figma, and revised work through reviews with subject matter experts.

SKILLS

UX: Usability Testing, User Research, Competitive Analysis, Heuristic Evaluation, Personas, Service Blueprints, Journey Mapping, Information Architecture, User Flows, Wireframing, Prototyping
UI & Visual: High-Fidelity UI, Interaction Design, Visual Hierarchy, Typography, Motion Graphics, Video Editing
Tools: Figma, FigJam, Adobe Photoshop, Illustrator, InDesign, After Effects

ACHIEVEMENTS

- Top 50 Honoree, Design Pitch 2026, UMO Design Foundation (UXINDIA Design Leadership Week, Bengaluru)
- Top Fellow, NextLeap Product Designer Fellowship
- Demola certificate for two industry projects: Vayu and Konecranes

EDUCATION

M.Des, UI/UX Design | Ajeenkya DY Patil University | 2025 to 2027 (expected)
BSc, Animation and Multimedia | Arena Animation | 2021 to 2024
